Treecology: 30 Activities And Observations For Exploring The World Of Trees And Forests (Young Naturalists)

Synopsis

Did you know . . . Trees have many talentsâ ”they can feed and house animals, create windbreaks, protect watersheds, and help prevent soil erosion.Â Researchers believe they have found the oldest tree in the worldâ ”a spruce in Sweden that has been alive for about 9,500 years.Â Even dead and decaying trees and stumps are often teeming with life! Â Young nature enthusiasts will learn these and many other fascinating facts about the wonderful world of trees in Treecology. This fun and interactive resource includes plentiful full-color photos and drawings and clear, kid-friendly discussions of tree structures, families, and foods; the interaction between trees and the wildlife that depend on them; tree and forestâ “related jobs and preservation, and much more. With encouragement to â œTry This,â • â œLook For,â • and â œListen For,â • kids participate in 30 hands-on activities that promote observation and analysis, writing and drawing, math and science, and nature literacy skills. They will measure the circumference of a tree trunk, press and preserve leaves, study the textures of tree bark, find evidence of forest creatures, record their findings in a decorated forest logbook, and more. Readers from any region will start to take notice of the trees around themâ ”not just in forests and woods but also around the schools, parks, buildings, and sidewalks of their town, and in their own backyards. Useful resources include a glossary of â œtree terms,â • common and scientific names, a list of tree and nature organizations and groups, and a teacherâ™s guide to initiate classroom discussion and investigation.

Book Information

Series: Young Naturalists

Paperback: 144 pages

Publisher: Chicago Review Press (September 1, 2016)

Language: English

ISBN-10: 1613733968

ISBN-13: 978-1613733967

Product Dimensions: 11 x 0.3 x 8.5 inches

Shipping Weight: 15.2 ounces (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 starsÂ Â See all reviewsÂ (1 customer review)

Customer Reviews

Name an element in nature near which almost everyone lives? Trees! This detailed, hands on guide to learning about trees is the perfect tool for getting children to explore the natural world around them. When we moved from the South to New York City one of the things I was most concerned with was the lack of opportunities for my kids to spend time in nature. Even in a big city we have trees right outside our front door and with this book the ideas for exploring them seem limitless. Treecology is filled with beautiful photos, interesting information, and 30 hands on learning activities for young children to do with parents or teachers. Get ready to look at trees in a whole new way!
