Customer Reviews

I used this book as a supplement to our homeschool history class. I initally purchased it for the full-color photos, and it was just what I hoped it would be to give my kids a good visual of the Aztec, Inca, and Maya. This volume contains, in addition to the beautiful visuals, interesting facts, helpful sidebars, and many fascinating resources to enhance a study on this topic. This is a nice book to have in your home library, and promises to be useful again and again.

The illustrations and photos in this book help you "see" how these ancient people lived. Though this book is for children, I purchased it for myself. It answered some questions I had and is a great resource.

This is beginning to arouse curiosity about these civilizations with the eight year old, such as when

and where and what people were like. I have always read about the Maya more than the others, so this is a fun read for me.

This series of books are great. I use them on my homeschool for history. My kids love looking at all the pictures and the books with posters are an extra bonus.

There are a lot of pictures of actual artifacts, weapons, etc. These books are very visual and that brings the subject to life.

good book- covers a lot- kids like it- no objections- good price for real education. It seems it will last a long time.

Fascinating as the people written about and recorded on the CD. It takes us back for a visit to the way life was for these people then.

and all the other DK Eyewitness books I bought for my great grand son. He also loves it and I intend to buy him all of the books.
