Sure, I studied American history in high school and college, but I really want to be able to explain to my daughter why I am so passionate about the freedoms that we are supposed to have in this country. It seems lately, the most offensive thing one can do is profess some belief in the Bible. Yet here's a book that affirms what my grandparents taught me: that this nation was a place where people sought refuge from all kinds of tyranny around the world and that it was founded on the principle of God-given rights. I was a little surprised when this book arrived and I cracked it open to find a textbook. I grabbed a yellow crayon from my daughters room and each night I read and highlight before bed. Reading it, I feel a bit as though I'm learning of a gift bequeathed to me by a relative I never met.

What a valuable, important work. The Miracle of America reveals how precious and unique our

constitutional republic really is. After reading this book, I have a deepened sense of reverence for our government and those who worked so hard to establish a nation for people of all beliefs. The book explores a wide range of factors that led to our government's creation, and it highlights the need to promote conscientious citizenship in our young people through fact-based, relevant education. Kamrath is a rigorous researcher, and her reliance on primary source documents places her among the most ethical and professional scholars.

Every American school should have this textbook in the curriculum so that the students know the true Judea Christian foundation our country and government. I have shared this with my church and my college. In today's schools students are not given the history of our country and state were based on religion. When the President states the Muslims were a major part of America's foundation - he needs this text.

Demonstrates the direct link between inherent individual freedoms rooted in Judaic - Christian tradition, the Reformation, and the reasoning of the Founders of the United States. Almost too detailed in citing the precise and numerous Biblical references, but leaving nothing out builds a solid, irrefutable foundation for the books factual case. Fills the immense vacume of information left by the failure of public (and probably much private) education to address this enourmously important fact about American history. Every American adult should read this and make sure their children do too when they are old enough to comprehend it.

Thoroughly researched history of the principles and philosophy upon which America was created. I especially appreciated the concepts of sovereignty and consent of the governed. God is sovereign, God created humans, and humans created the U.S. government which operates only at the consent of the governed. Our founders created our government this way because, through experience, they had a thorough understanding of dictatorships. I was educated in public schools for grades 1 through 12 and this book filled an inexplicable void in my understanding of America.

This is a part of a school course and should be taught on the college level. Need to use Bible to go along with book.
