## Synopsis

From the illustrator who showed the periodic table in a whole new light and gave us his fresh spin on physics, biology, astronomy, rocks and minerals, planet earth and chemistry, comes Basher Science: Oceans, Making Waves! created and illustrated by Simon Basher and written by Dan Green to give us a look into our magical and mysterious oceans. Not content to stay on dry land, Basher takes to the high seas in this friendly guide to everything above and below the oceans. Meet the members of the Shoreline Gang, the Deep-down Dandies, and the characters in the Open-water Crew. Encounter deep trenches, curious creatures, mountains taller than any you will find on land, and the mixers and stirrers that keep the water flowing. Throughout it all, Basher's bold, cheerful artwork pairs with rock solid scientific information to personalize readers' understanding of Earth's mysterious underwater world. Bonus: includes a must-have pull out poster of the oceanic characters

## Book Information

## Customer Reviews

My 10 year old son loves these books from Basher. His third grade teacher had the Basher book on Rocks and Minerals and he was always reading it so at the end of the year she gave it to him. He has now asked for all of the books and because they are such informational and educational books I

never refuse. He now has his whole class hooked on these books.

this series of books by Basher are easy to understand, interesting drawings, and keep my child's interest. These books are worth buying for your kids who are learning these subjects. Keepers on the bookshelf - its money we'll spent. I like these books a lot.

As a retired tteacher, I gave the entire series a thumbs up. Colorful illustrations and easy to understand info. My 4 year old granddaughter loved her present and was anxious to have her DAD read it that very night :)

My boys love these books! This one was one of their favorites. I homeschool my boys and we can not say enough about the Basher books. As soon as we finish one we jump on  and order another one.

Basher books are wonderful sources for reluctant readers! They lure them into the topic. The series is great! The Science books are some of the classes favorites.

My sons loved all of the Basher Books. He has us read them to him over and over again. If you have a factoid child like we do, you should get these books.

My kids, 9 and 13 love this series. To have some stickers to play with was great. My son has aspergers and he loves this series. Learning and fun.

Our son has almost all the books in the series. Beautifully drawn and written in such a way that any can understand. Highly recommended!!
